Inferring whole-genome histories in large population datasets
Kelleher et al. (2019)

Summary

Summarise the paper in your own words.

Reflection

Reflection on the process. What was most difficult in reading, preparation, presenting

How went your presentation? What are you happy with? What would you like to improve? What did you learn from the feedback form?

Reflection about your Q&A session.

Reflect how you could apply the paper's content in your own field. What gaps would you have to fill?
